ABOUT BULLS COIN

BULLS is a token from the binance smart chain network that brings opportunity for all people to be part of a investment structure in the area of civil construction in order to actively participate through the token that works as a mediator promoting investor interaction with our ecosystem, enabling greater access to investments in the crypto world with self-sustainability of the BULLS project, which was designed to keep the project always active and valuing the project as a whole, generating profits from the sales of properties, with most of the profits being injected into the chart, providing a strong increase in price and appreciation asset bringing profit to investors.

CONSTRUCTION MARKET

The civil construction market is around R\$570 billion per year only in Brazil, registering an increase every year.

According to Savills Global Research Report, in 2016 alone, the global real estate market capitalization was approximately \$217 trillion, around 2.7 times global GDP, 36 times global gold mining (US\$6 trillion) and is responsible for 60% of the main assets, making real estate the best option in the economy for investments, whether for countries, companies or individuals.

BENEFITS FOR INVESTORS

**AT BULLS, INVESTORS HAVE THE OPPORTUNITY TO GAINS
IN THE EXCHANGE RATE APPRECIATION THAT OCCURS NATURALLY,
PLUS BUY AND BURN 2% OF ALL PROJECT FEES.**

The investor will also gain from the appreciation after the sales of the completed works as 60% of the total profit will be injected directly into the BULLS chart being bought and burned, generating appreciation of the token and making it even more scarce, reducing the circulating supply.
